KIDNEY TRANSPLANTATION

Cadaveric organ donation: Indian perspective

- According to National Organs & Tissue Transplantation Organization (NOTTO), a total of 1028 deceased organ donation was there in 2023.
- Telangana continued at the top with 200 donations followed by Karnataka (178), Tamil Nadu (176), Maharashtra (149) and Gujarat (146).
- Each cadaver donor on an average donated three organs, so 2,800-3000 organ failure patients benefited from this in a single year.
- However, the US has a 100 times higher deceased organ donation rate than India. It has 41 deceased organ donors per million population which is just 0.4 in India.
- Emerging market peers like Brazil (13.8) and China (3.63) also have a higher rate than India.

Ref: Indian Journal of Forensic and Community Medicine - Official Publication of Innovative Education and Scientific Research Foundation

<https://www.ijfcm.org/html-article/22274#:~:text=According%20to%20National%20Organs%20&%20Tissue,2021%2C%20similar%20to%202019.8>

Organ Retrieval

- **First in-house cadaver organ retrieval** was performed on **6.08.2024**.
- One recipient of a kidney was a 50 yrs old beneficiary of ESI, who was on dialysis since last 4 years.

- Liver and another kidney were allotted to Osmania General Hospital.
- This process involved meticulous planning and coordination among teams of Doctors, Administration, Nurses and paramedical

Kidney transplantation

SSH performed 1st kidney transplant in ESIC

SSH also performed ABO incompatible kidney transplant
